EXPERIENCE

Application Engineer Oracle, Hyderabad

Aug 2022 – Oct 2025

- Owned end-to-end delivery of backend features on OCI: HLD/LLD, OpenAPI contracts, data modeling, release planning, and rollback-safe deployments.
- Worked as an OCI administrator supporting production environments: provisioned and managed ATP, Compute/VMs, VCN/subnets, security lists/NSGs, IAM policies, and Object Storage; handled access control, connectivity, and operational hygiene.
- Built and maintained production microservices and REST APIs using Java (Spring Boot/Spring MVC) with consistent API patterns (versioning, pagination/filtering, idempotent writes, standardized error schemas); supported data services and automation using Python (FastAPI/Flask).
- Implemented authentication and authorization using OAuth2/JWT and RBAC; enforced request validation, least-privilege access, and audit-ready logging for secure data access.
- Delivered ATP snapshot backup and ML-ready data automation pipelines using OCI Data Flow and Object Storage: scheduled orchestration, partition-aware loads, data quality validation, and versioned outputs for BI/AI consumers.
- Integrated an LLM-powered AI agent (text-to-SQL/NL2SQL + result summarization) with governance controls (RBAC, query guardrails/allowlists, audit logs) enabling safe self-serve data querying.
- Led legacy database migration to Oracle ATP: extraction/load, reconciliation and validation, rollback-safe cutover; built a secure API layer for downstream applications.
- Improved performance and reliability through SQL query optimization (indexes, query plans), resilient client patterns (timeouts/retries), and observability improvements (structured logs, metrics, correlation IDs).

PROJECTS

- Subscription Management Backend** (Java, Spring Boot, Oracle Database 23ai, JPA/Hibernate, REST, OAuth2/JWT): Built enterprise subscription lifecycle APIs/microservices (onboarding, plan changes, proration, renewals, cancellations) with domain modeling, idempotency, validation, and audit trails; integrated with billing, CRM, and analytics consumers; added resilience and observability (timeouts/retries, structured logging, metrics).
- ATP Snapshot AI Data Automation Agent** (OCI Data Flow, Object Storage, Oracle ATP, SQL, Python, FastAPI, Pandas, ETL): Built scheduled, partition-aware extracts/loads to maintain a recoverable reporting copy of ATP; automated dataset restructuring with validation and versioned outputs for BI/AI pipelines; integrated an LLM-powered AI agent (NL2SQL + summarization) with RBAC, query guardrails, and audit-ready logs.
- Legacy Database Migration & Secure OCI API Layer** (OCI, Oracle ATP, SQL, Python, FastAPI): Designed target schema and migration plan; executed data extraction/load, reconciliation, and validation with rollback-safe cutover; deployed secure REST APIs on OCI Compute with authentication/authorization, input validation, health checks, standardized errors, and resilience (timeouts, retries).
- Full-Stack Coding Practice & Assessment Platform (Personal Project)** (Python, FastAPI, PostgreSQL, React, TypeScript, Docker, Nginx, GitHub Actions, Linux/Hostinger VM): Built Student/Admin panels with JWT auth (HTTP-only cookies, RBAC); delivered CRUD for users/problems/MCQs/submissions; implemented online judge (/run, /submit) with per-testcase execution, verdict storage, and Docker sandbox resource limits; set up CI/CD (build/test, Docker image packaging, automated deploy) and deployed behind Nginx reverse proxy with TLS; added learning flow, submission history, and leaderboard.

SKILLS

Languages: Python, Java, Golang, SQL

Backend: Microservices, REST APIs, OpenAPI, OAuth2/JWT, RBAC, idempotency, pagination/filtering, validation, structured logging, metrics, correlation IDs

Frameworks: Spring Boot, Spring MVC, FastAPI, Flask, Django

Databases: Oracle ATP, Oracle Database, PostgreSQL

Cloud/DevOps: OCI (Compute, ATP, Object Storage, Functions, OIC, Data Flow, VCN, Load Balancer, GoldenGate), Docker, Kubernetes, Terraform, Jenkins, Git, Linux, Nginx

Web: HTML, CSS, JavaScript, React

EDUCATION

Cochin University of Science and Technology

2018–2022

B.Tech in Information Technology

CERTIFICATIONS

Oracle Cloud Infrastructure Foundations Associate

Oracle Cloud Infrastructure Architect Associate

Oracle Cloud Infrastructure AI Foundations Associate

Oracle Cloud Infrastructure Application Integration Professional

Oracle Cloud Infrastructure Data Management Foundations Associate

Oracle Database SQL Certified Associate

Oracle Certified Professional, Java SE 11 Developer
